

1,000+ Games Delivered Per Season.

<8-Hour TAT.

20% Cost Reduction.

CLIENT SNAPSHOT

Basketball analytics company (under NDA). Provides advanced data products to professional teams and leagues. Required scalable, reliable post-game play-by-play and event tagging to support product launches and contract renewals.*

THE CHALLENGE

► Vendor dependency risk:

Vendor failure during peak period threatened product launch deadlines and client deliverables.

► High in-house costs:

In-house annotation costs were unsustainable heading into contract renewal season.

► Seasonal peaks:

Seasonal peaks (NCAA + international competitions) required elastic capacity the existing setup couldn't provide.

THE SOLUTION:

200 games per month

tagged with 24/7 global coverage across time zones

23 analysts + 3 Team Leads

calibrated to client taxonomy in 1 week via video-based onboarding

Proprietary annotation platform

with CSV export to integrate seamlessly into existing workflows

<8-hour turnaround time

maintained across all competitions

**Client name and specific engagement details available under NDA. References provided upon request.*

**95+ quality score**

(85+ floor) enforced through Team Lead review and backup analyst pool

**~20% cheaper**

than in-house team at equivalent quality and speed

HOW WE PLUG IN

**Week 1:
Onboard**

Video lessons + sample calibration → analysts productive in 7 days.

**Week 2:
Calibrate QC**

Team Lead review cycle established; quality targets locked.

**Ongoing:
Run 24/7**

Global analyst pool covers all games; backup capacity for peaks.

**Daily:
Review & Export**

CSV deliverables reviewed and pushed to client systems same-day.

RESULTS

1,000+ games delivered
over one full season

<8-hour TAT
maintained across all delivery windows

~20% cost reduction
vs. in-house staffing model

95+ quality score
achieved consistently; zero missed deadlines

200 games per month
sustained through NCAA and international competition windows

Peak resilience
When the previous vendor failed 72 hours before a product launch deadline, our 24/7 team and backup pool absorbed the load, protected TAT, and delivered the coverage needed to hit go-live on schedule

WHAT THE CLIENT SAID

"They didn't just replace our vendor—they became the reliability layer our product roadmap depends on. The speed and consistency during peak windows completely changed our planning."

— Head of Data (under NDA*)
